We Believe in Going the Extra Mile

See and Feel the UltraBuilt® Difference

Durability and Strength

You'll appreciate the peace of mind you get watching your children swing from any of our massive triple 2 x 6 support beams. Hand-crafted legs and beams are laminated, making them much stronger than solid timbers. You'll be glad we went beyond industry standards.

Cutting Edge Design

It's in the details. UltraBuilt's cutting edge designs feature kid friendly, glass smooth wood surfaces with rounded corners, specially treated weather resistant lumber, and flat steps to steady little feet on our angled fort ladders.

Craftsmanship

At every level of production, "our team" of skilled craftsmen hand-select and inspect the quality of every component. Your custom designed play system is backed by UltraBuilt® Pride! We believe in going the extra mile and that everyone investing in a play set should be treated to the very best. Our priority is to produce long-lasting play equipment that can be enjoyed for more than a generation.

Value

Our play sets are simple to assemble, with pre-built components, parent-friendly illustrated instructions and technical support available. Experience has shown that our customers appreciate the value our sets offer them; and, at UltraBuilt® we feel a sense of privilege when you choose to do business with us. We return our appreciation by maintaining the highest standards of honesty, integrity and quality that you can be proud to tell others about.
